

## Care Instructions:

### Storage:

Store in a cool dry area away from direct sunlight, humidity or moisture.  
Do not stack anything on top of your board.

### Playing Surface Care:

- Dust off your board before playing. Dust on the surface can cause scratches and negatively affect game play, slowing down the discs etc.
- Do not use any furniture cleaner or sprays (eg. Pledge) on the surface of the board.
- Do not use any talcum powder or Carrom board powder on the surface.
- Each Flick board comes pre-waxed and -polished, so you should not need to treat the surface except wiping it down.
- If you do want to “top up” the waxed surface, we recommend a very thin layer of Carnauba solvent free wax and then polishing it with a soft lint free cloth or felt. For ease of use we recommend Antiquax Original Wax Polish spray.
